Summary

Strategic data analytics and transformation leader with 12+ years of experience driving technology-enabled change across banking, capital markets, risk, and operations. Specialized in designing analytics solutions, automating complex workflows, developing data pipelines, and translating business challenges into scalable technical solutions. Deep expertise in Python, SQL, ETL automation, robotic process automation, and executive reporting, with a proven track record of improving data quality, operational efficiency, governance, and decision support within highly regulated financial environments.

Professional Experience

Origin Bank | Compliance Risk Data Analytics VP | Remote | September 2025 - Present

- **Process Automation:** Automated the quarterly OFAC screening process end-to-end, replacing manual review with a rules-based Python workflow — improving screening consistency, cutting turnaround time, and strengthening auditability.
 - **Data Pipelines:** Designed and built automated pipelines to load and refresh SQL tables on a schedule, eliminating hours per week of manual ETL work and accelerating analytics production for the compliance function.
 - **Quantitative Model Tuning:** Wrote Python-based conditional probability models to set and calibrate alert thresholds across 50+ anti-money-laundering and fraud detection agents, minimizing false positives while preserving sensitivity to suspicious-activity-report-worthy events.
 - **Risk Modeling:** Built quantitative and qualitative models to validate customer risk ratings, applying Python-based analysis to support financial crimes risk management (FCRM) compliance decisions.
 - **Board Reporting:** Developed and maintained board-level reporting dashboards, translating complex compliance and risk data into clear, decision-ready visuals for senior leadership.
 - **Alert Management:** Owned day-to-day alert management, using ad hoc Python and SQL queries to investigate and resolve issues in real time.
 - **Account Opening Process:** Helped deliver a redesigned new-account-opening process, coordinating with two vendors to ensure data integrated seamlessly across systems — resulting in faster account opening and improved accuracy of customer identification.
 - **Audit Support:** Resolved data-heavy audit findings through hands-on analysis, closing gaps identified during internal and external audits.
-

BNY Mellon – Pershing | Business Technology Liaison Sr. Associate | Lake Mary, Florida | March 2022 – September 2025

- **Stakeholder Collaboration:** Collaborated with Directors, Product Owners, Finance, Engineering and end-users, drawing upon over a decade of financial markets expertise to identify comprehensive functional and data requirements. This collaboration facilitated seamless technical solution development for the Global Markets Trading team.
- **Project Management:** Decomposed complex epics into actionable features and user stories, capturing detailed functional and nonfunctional requirements in Agile environments. Led solution demonstrations to product ownership teams, highlighting delivered user stories and representing the solution owner in backlog prioritization, sprint planning, and UAT.
- **Reporting and Visualization:** Utilized SQL and other ETL tools to develop sophisticated ad-hoc reports from raw trade data. Subsequently, these reports were transformed into daily refreshable Tableau/Power BI visualizations, effectively presenting key metrics to Directors.
- **Models:** Created risk and forecasting models to support long-term infrastructure decisions, driving operational rigor and improved budget visibility.

- **Data Quality & Integrity:** Performed comprehensive data integrity assessments across enterprise systems, identifying and resolving discrepancies, duplications, and inconsistencies. Applied advanced Excel techniques to streamline data validation, ensuring consistent and accurate datasets aligned with business standards.
 - **Data Mining:** Executed data mining and advanced analytics projects leveraging SQL and Python to generate actionable insights that influenced enterprise-level Cloud and Infrastructure strategy.
 - **Data Transformation & Analysis:** Expertly curated, synthesized, and transformed intricate market operations data through Python scripting, guaranteeing data integrity and reliability for pivotal business insights.
 - **Automation and Efficiency:** Developed and implemented business-critical automations that enabled the Compliance team to meet stringent deadlines. Applied strong data governance practices to monitor data quality and streamline compensation processes through automated validation scripts, VBA macros, and scheduled ETL jobs.
 - **RPA & Workflow Optimization:** Designed and deployed UiPath Studio Pro robots and MS Power Automate flows yielding hundreds of hours of time savings and significantly reducing data entry errors.
 - **Technical Leadership:** Served as the in-house MS Excel expert, building macros and custom pivot tables. Mentored coworkers on advanced automation solutions and effectively communicated complex technical concepts to non-technical stakeholders using flowcharts and diagrams.
 - **Requirements Engineering:** Authored comprehensive Business Requirements Documents (BRDs) and Technical Requirements Documents (TRDs) to drive the design and implementation of automation solutions and ETL workflows, aligning cross-functional stakeholder needs with scalable, high-performance data pipelines and process optimizations.
 - **Issue Resolution:** Independently drove initiatives, diagnosed complex issues, and implemented effective resolution strategies, maintaining robust data frameworks and ensuring completion of objectives.
 - **Strategic Liaison:** Acted as a strategic liaison between engineering, cloud operations, and executive teams to ensure metrics aligned with business objectives and industry benchmarks. Identified process enhancement opportunities and collaborated with technology partners to implement solutions for improved efficiency and risk mitigation.
 - **Prompt Engineering:** Leveraged AI to build innovative solutions for trading teams, directly contributing to increased operational efficiency, reduced manual errors, and more precise business insights and reporting.
-

Cowen Inc. | Operations Associate | Lake Mary, Florida | April 2017 – March 2022

- **Process Automation & Reporting:** Programmed and automated a daily dashboard for Managing Directors and the COO, providing a clear, real-time view of firm-wide breaks and their resolution. Utilized Workday and Salesforce data models to design advanced compensation reports, manage ad-hoc data requests, and ensure data integrity across internal compensation tools.
 - **Global Team Leadership:** Guided a global team of analysts responsible for reconciling hundreds of accounts, ensuring accuracy and accountability for audits.
 - **Regulatory:** Led remediation and reporting projects related to FOCUS filings, improving data integrity across stock loan processes to ensure alignment with FINRA and SEC regulatory standards.
 - **Collaboration:** Collaborated with Risk, Compliance, and Operations to design internal controls and audit procedures that reduced Reg SHO 204 fails by 35% and strengthened the firm's overall regulatory reporting posture.
 - **Financial Data Expertise:** Provided advanced end-to-end operational support for securities, loans, exchange traded derivatives, and OTC derivatives across multiple lines of business.
 - **Trade Processing & Reconciliation:** Researched and resolved complex trade lifecycle issues, simplifying client interactions and enhancing client satisfaction. Performed high-level data reconciliation by researching, comparing, and cleansing product data against vendor sources and internal databases.
 - **Data Optimization:** Constructed macros to optimize datasets for efficient upload, meticulously reconciling shares and cash related to DTC CNS via the PNS account.
 - **Audit & Compliance:** Led quarterly and yearly presentations on reporting procedures and results to both internal and external auditors, demonstrating strong communication and compliance adherence.
-

Convergenx Group LLC | Global Equities Analyst | Orlando, Florida | April 2013 – April 2017

- **System Optimization:** Transformed a completely manual back-office reconciliation system by implementing automations and advanced MS Excel functions, significantly improving efficiency.
 - **Complex Reconciliation:** Reconciled 950 cash statements with internal data across over 150 foreign and domestic markets, resolving intricate trade issues with settlement, middle office, stock loan, and treasury teams.
 - **Adaptability & Problem Solving:** Successfully navigated two order management system transitions, reconfiguring daily workflows and effectively explaining cash and equity breaks to auditors during audits.
 - **Reporting:** Led intake, scoping, and delivery of ad-hoc compensation reporting requests, ensuring accuracy, timeliness, and clarity across cross-functional stakeholders.
-

Education

- **Master of Business Administration** | **University of Central Florida** | Orlando, Florida | May 2021
 - **Bachelor of Science, Finance** | **University of Central Florida** | Orlando, Florida | August 2012
-

Skills

- **BI Tools:** Power BI, Tableau, Apache Superset, Dataiku
 - **Programming Languages:** SQL, Python, VBA, TypeScript, Power Query M
 - **Robotics Process Automation:** UiPath Studio Pro, MS Power Automate, Automation Anywhere
 - **Microsoft Office Suite:** MS Excel, MS Power Query, MS Access, MS Visual Studio Code, MS SharePoint, MS Visio, MS PowerPoint, MS Teams
 - **Financial Systems:** Bloomberg Terminal, Broadridge, Netx360, Shadow, Loanet, Thomson One
 - **Project Management:** JIRA, Confluence, Agile, Scrum, Waterfall, Sharepoint, Miro
 - **Cloud :** AWS, Azure, Snowflake, Databricks
 - **Database:** PostgreSQL, Oracle, MySQL, MS SQL Server
 - **Financial Compliance:** FOCUS Reports, Reg SHO 204, Financial Crimes Compliance, AML, Regulation T
 - **Artificial Intelligence:** Codex, Claude Code, Claude API, Pydantic Agent Framework, LangGraph
-

Certificates & Achievements

- **FINRA Series 7 License** | CRD#: 6603334 | Issued: March 2016
 - **UiPath Studio Pro Training** | Issued: March 2023
 - **Datacamp Data Analyst Certification** | DAA0010129338825 | Issued: August 2025
-
